Dear John,

Yes, that confirms my understanding. The leak check at Fermilab is waived because it was provided by the vendor.

Best wishes,  
Camille

John Zweibohmer wrote:

Hi Camille,

The leak check of the first 6 RI cavities received before the holidays was waived and the incoming QC leak check traveler reflects this. We believe that this will also apply to the second lot of 6 RI cavities that came in right after the first of the year; Is that correct?

John
